# Reasons

To Reconsider In-house Online Learning

# Limited Expertise

In-house teams may not have the necessary expertise or experience to develop high-quality online learning content.

### Lack of Resources

In-house teams may not have the resources, such as **software or specialized equipment,** needed to develop and deliver online learning.

# Limited Scalability

In-house teams may not have the capacity to scale up and accommodate a large number of learners, particularly if the demand for online learning increases suddenly.

#### Distractions

In-house teams may face distractions and interruptions that can impact their productivity, such as **meetings**, **emails**, and other work-related tasks.

#### Limited Time

In-house teams may have limited time to devote to developing and delivering online learning, as they may have other responsibilities and priorities.

#### Limited Feedback

In-house teams may not have access to the same level of feedback and support as external providers, which can **impact the quality and effectiveness** of the online learning.

# Limited Support

In-house teams may not have the same level of support as external providers, such as **technical support or customer service**, which can impact the learner experience.
